FULLSTACK DEVELOPER

HackBio • December 2021 - January 2023

As a full stack developer at [HackBio](#) I built and maintain all HackBio's applications which include the admin application, the client application, the internship application, the static home website, the forum using discourse. I work principally with Typescript for both backend and frontend and use the following frameworks and libraries: **Reactjs**, **Nextjs**, **Nestjs**, **Material-UI**, **Django** etc. I work with technologies: **Postgres Database** in the Backend for storing data, **Nginx** as Proxy server and **Docker**.
